- SUSTAINABLE

T-FLY ULTRALIGHT

- **Beyond the lightness.** T-FLY creates a new generation of thermoplastic materials for an ultralight, performing, versatile and sustainable sole.

T-FLY ULTRALIGHT

Highly performing. T-FLY is the ideal material to give a proper grip to the sole, with an excellent abrasion resistance.

Versatile. T-FLY adapts to every type of footwear, offering infinite possibilities for modeling. It can be made in a wide range of colors and can be glued, painted and pad printed like a traditional TR.

Sustainable. T-FLY combines environment and economy. It is totally recyclable and guarantees short molding timing, reduced energy consumption and high productivity.
